```
22   brightness = maxBrightness;
23   analogWrite(LED_PIN, brightness);
24   delay(3000);
25 }
26
27 delay(incrTime);
28 start = start + incrTime;
29 }
30 }
```

Output

```
Sketch uses 437 bytes (15%) of program storage space. Maximum is 28672 bytes.
Global variables uses 155 bytes (6%) of dynamic memory, leaving 2405 bytes for local variables.
Connecting to programmer: .
Found programmer: CATERIN; type = S
Software Version: 1.0; No Hardware Version given.
Programmer supports 16 bit address increment.
Programmer supports memory access with bufsize=128 bytes.
Programmer supports the following devices:
Device connected: ATmega328P
```
